#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This office action is in response to the Amendment filed 11 February 2004.

#### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 (including the subject matter of cancelled claim 2) and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakumura et al. (U.S. Patent 5,518,390), hereafter "Nakumura," as stated in the paper mailed 13 November 2003.

#### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakumura, in view of Bulgrin (U.S. Patent 5,997,778), as stated in the paper mailed 13 November 2003.

#### ***Response to Arguments***

Applicant's arguments filed 11 February 2004 have been fully considered but they are not persuasive.

Art Unit: 1732

Applicant contends that Nakumura does not teach the instant invention because he does not describe a method wherein the correction value is obtained by operating the injection cylinder unit for a predetermined number of the injection shots by ordinary injection position feedback control, and subsequently shifting control open loop control of the injection cylinder using the correction value and the previous command data. This is not persuasive because Nakumura clearly teaches operating the injection cylinder for a predetermined number of shots (Column 2, lines 49-52, specifically "the preceeding one [cycle] in which correction value Av has been calculated"; Column 3, lines 4-6, specifically "the preceeding one [cycle] in which correction value Av has been calculated"), and then subsequently shifting to open loop control of the injection cylinder using the correction value (Column 2, lines 49-56; Column 3, lines 4-15; Column 4, lines 30-37). See Figure 3 for support that there is one shot per cycle.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1732

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
